

High quality cooling solutions for your needs...

Asia Vital Components Co., LTD (AVC), as a global market leader for thermal solutions, is dedicated with diverse thermal management, manufacturing, and development of innovative cooling applications for indoor and outdoor LED Lighting industry.

Our aims are providing effective thermal management to dissipate thermal loads generated by LED systems and by prolonging our users with the optimum LED products, combined with optimized thermal management in terms of different design concepts and environmental conditions.

In order to satisfy our customer's satisfaction, we keep investigating new thermal technologies applied to LED lighting applications by providing our partners the optimum longer product life.

AVC provides thermal solutions by

-  Aligning OEM/ODM business with a cost-effective operational model.
-  Optimizing slim, light, and unique heatsinks available in customized options.
-  Advising the better thermal expertise in passive and active cooling solutions.
